LIFE IS JUST ONE SLIT

SKIRT AFTER ANOTHER

"Every time a feller begins to think the world is gettin' better somebody invents a new dress skirt," remarked Abe Martin. It does look like life is simply one thing after another. Yesterday in this column it was observed that surely the high cost of living could not be laid at the door of the poor gas man and this morning along comes a consumer and shows another euriosity in the shape of a gas hill which jumped from \$3.50 in December to \$10.15 in January. The Gas Company explains this in another column.-Lexington Leader.

RELIGION MUST KEEP IN TOUCH

WITH LIFE OF PEOPLE. "Separate religion from life, from public life, social life, business life, the life of the community make it a mere theology or a mere subjective experience or a mere ritualistic cult, and it grows some and bitter and raucid: it becomes Pharisceism or orthodoxism or familieism or superstition. On the other hand, if it is kept in constant and vitulizing touch with the life of the people it is kept pure and rational and fruitful of good works. The only way to keep our own religion same and vital is to make it a power in the life of the community and the nation. The tendency is just as strong today as it was 25 centuries ago to separate religion from life. Perhaps there are as many people today as there were in the days of Amos who think that the attempt to bring the Christian law to bear on trude and business, on city politics and national problems is a profanity of the pulpit and a desceration of the Subhath,"-Dr. Washington Gladdens.

RAILWAY BUILDING IN 1913.

A summary of railroad construction in the Unitrd States during the year 1913, as compiled by the Railway Age Gazette, shows a total of 3,071 miles of new first truck. This mileage is approximately the same as that of 1912 and that of 1911.

The Gazette figures show that new mileage was reported in 1913 by 238 companies in forty-seven States. No new mileage was added in Connecticut. Rhode Island, Delaware or Alaska, Montana leil in new construction with 375 miles. Texas was secand with 356 miles. Other States in which more thmn 100 miles of new line were completed are: Washington, 209 miles; Culifornia, 164 miles North Dakota, 152 miles; Arknusas, 139 miles: Gregon, 123 miles; Illinois 114 miles; Tennessee. 411 miles; Florida, 105 miles; Michigan, 104 miles. and North Carolina, 104 miles.

Kentucky's mileage of new first track for 1913 was 48.34 miles, compared with 119.63 in 1912. In addition there was reported 43.12 miles of second track, compared with 93.70 miles of such truck in 1912. This represents double track work by the Louisville & Nashville and by the Cincinnati, New Orleans & Texas Pacific. All the new construction was in Eastern Kentneky. The Beaver Creek branch of the Chesapenke & Ohio, twenty-one miles, was the longest.

The Railway Age Gazette says the outlook is not promising for a busy year in 1914, as only one or two large contracts have been let since July I "The small amounts of new lines now under con struction indientes that the mileage built in 1914 will show a further decrease, unless conditions

ehange radically in the spring." Kentucky's prospects for 1914 would seem to be for an amount of construction equal to that of 1913. The Clinchfield is building to the Elkhorn coal fields, as is the Norfolk & Western, and some other extensions seem within the range of proba bility.-Courier-Journal.

ADVERTISING A CITY.

As was to have been expected the newspapers cago, while in parsult of her dutles, in the cities near Huntington have taken up with gusto the sensational story of a sermon delivered in Huntington Sunday and printed in Huntington

Here are some headline assertions: From the Parkersburg State Journal:

"Sepsation Spring at Hintington; Details of Drunken Dance Given; Declared That Nine-tenths "Those Present Were Intoxicated: Women Were 'onspirious by Absence of Clothes."

From the Ironton Register:

"Drimkenness and Indecency Charged by Huntington Minister Against Four Hundred of West Virginia City; Dance Attended By Most Disgraceful Conduct Ever Witnessed in Huntington, Says Witness Who Makes Sworn Statement.

These are but two of many instances that might fence, down the lane and throughout be cited. It will be noted that the details are not permitted to grow tame as they are told further away from home,

OHIO TOO MUCH GOVERNED.

We have before as State Auditor Donahey's interesting tubular statement of the State's expenditures during the past year. When one glances at the columns of figures for this and for that, he is apt to wonder how much of it is necessary and if a good deal of it couldn't be saved. How much of it the budget commissioner knocked out we cannot say. Maybe he knocked out all he could, but we are certain not all that ought to be thrown uside us needless. Why, it is an awful expense. It is hewildering. Why the legislature doesn't eliminate about 25 per cent,, as not doing the people a particle of good, we cannot say.

Much of this expense has grown on the State like the mistletoe on the majestie onk. Cun it be possible that we are keeping up government for the sake of government? When one gazes upon that table of expenditures he is almost convinced, as the saying goes, that's about the size of it. There are some things in that statement that don't crystalize to any noticeable extent in the public welfare. And there are other things that convince un initiitored mind that we are governed entirely too much. -- State Journal.

HOW A RESERVE BANK WILL OPERATE.

To proceed with a simple explanation of the (Currency) bill, let us take the Federal reserve bank that will be located at New Orleans as a start ing point. This bank must have a capital of at least \$4,000,000. It will have duties to perform for the region assigned to it, which will doubtless comprise the State of Louisinua and several adjacent States in whole or in part. All of the national banks in this district must become members of the system, and must subscribe in proportion to their eapital to the stock of what will be called "The Federal Reserve Bank of New Orleans," State banks may also join the system upon their own application. This bank at New Orleans will be managed by a board of nine directors, three of whom will be mimed by the Central Board at Washington. Three of the other six will be bankers chosen by the membership broks of the district. The other three will be citizens of repute who are not bankers, but who will also be chosen by the membership banks. This bank at New Orleans will hold a part! of the reserves of the membership banks, and will

Let us suppose that in the time of the moving of the cotton erop a great deal of money is needed. temporarily in the New Orleans district. This can be supplied in several ways. The Secretary of the Treasury, acting with the Central Reserve Board at Washington, may transfer additional deposits from nunsed money in the Treasury. The Federal Reserve Board may make temporary transfer to New Orleans of surplus reserve funds in the Federal Reserve Bank at Chicago, or the one at New York. But the thing most particularly to be noted is the fact that the Reserve Bank at New Orleans will be prepared to rediscount cotton bills and commercial paper, and to supply the numerous membership banks with currency to be loaned to their enstomers upon such paper,-The American Review of Reviews.

That was the declaration of Dr. fired at us. We looked over the river Joseph Kossuth Dixou, in charge of the Rodman Wanamaker expedition to the North American Indian, which returned to New York from a six months' tour of the reservations Iu the west.

In a book Dr. Dixon gives his estimate of the American Indian as foi-

The Indian is a man of lofty deals; he is heroic in temperament and ineffably tragic in thought. Today the sublime thought in the Indiau mind seems to be that although he is doomed to extermination, yet will be dio undaunted."

Dr. Dixon's book is dedleated "to my brother, the Indian." it contains the stories of surviving scouts of the Custer massacre, and also the stories of some of the indian chiefs who fought Custer. The story of White-Man-Runs Hlm, a Custer scout, is as foliows:

"The Great White Father at Washington sent representatives out to our country. The Indians met them and heid a council. The Sionx were hereditary euemies of the Crows. The head man sent by the Great Father said to the Crows: 'We must get together and fight and get this iand from the Sioux. We must win it by and saw Reno in his engagement with conquest.'

"I stood faithfuily by the soldiers. They did not know the country. I did. he retreated to the hills. They wanted me for their eye; they could not see. The soldiers and 1 horses. fight, I must say we were hursued by the soldlers, we were on the warpath and we were on the warpath with the Crows and other tribes.

'Wo were driven out of the Biack Hilis by the men seeking gold, and our game was driven off, and we started on our journey in search of game. Our children wero starving and we had to have something to eat. There was buffalo in that region and we were moving, simply campiag here and there and fighting our indiaa enemies as we advanced, in order to get the game that was in this coun We fought this battle from daylight until three o'clock in the afternoon, and all of the white men were killed. I think that Custer was a very hrave man to fight all these in ilans with his few men from daylight until the sun was almost going down."

The poetical nature of the Indian was exemplified in the words of Chief Pienty Coos, chief of ail the Crow nation, in summoning other chiefs to 'The Last Great Council," organized in the vailey of the Little Big Horn, Montana, by the Rudman Wanamaker expedition. The Indian chieftain said

"I see as In a vision the dying spark of our council fires, the ashes coid and white. I see no more the enriling smoke rising from our lodge noies. i bear no longer the songs of the women as they prepare the meai, The autelope have gone; the buffalo wailows are empty. Only the wail of the coyote is heard.

"The white man's medicine is stronger than ours; his iron horse rushes over the buffalo trail. He taiks to us through his 'whispering spirit.' (The Indian's name for the teiegraph and telepiione.) We are like hirds with a broken wing. My heart is cold within me. My eyes are growing dim-I am old.

"Before our red brothers pass on to the happy hunting ground, let us bury the tomanawk. Let us hreak our arrows. Let us wash off our war uaint in the river. And I will instruct our medicine men to teli the women to prepare a great council lodge. 1 wiii send our hunters into the hills and plnes for deer.

MRS. WHITNEY'S DESIGN ACCEPTED

Pians for the Titanic memorial submitted by Mrs. Harry Payne Whitney of New York have been accepted by the Washington (D. C.) Fine Arts commission. The memorial is to he erected here to commemorate the heroism of the men who sacrificed their lives that the women passengers of the vessel might be saved Tho anaouncement was made by

of the Titanic Memorial association, which has raised \$43,000 for the erection of the memorial. She is also chairman of the committee that iinaily passed upon the designs. Mrs. Robert Chew, chairman of tho District of Columbia association, reccived a letter from Mrs. liammond communicating to her the fact that

Mrs. John Hays Hammond, secretary

the commission had approved the design submitted by Mrs. Whitney. Mrs: John Hay, president of the Titanic Memoriai association, also announced that Mrs. Whitney's design had been

accepted. Seven designs were submitted to the commission which, with Mrs. Hammond, made the selection. Some of the most prominent sculptors of the country were among the competitors.

Mrs. Whitney's design, it was learned, is a figure of a man, symbolic of heroism. The figure, in white marble, stands with arms outstretched and head thrown back, giving the impression from a distance of the Crucitizion. The figure, which is nearly nude, is to be 15 feet high. The peculiar position of the arms, the pose of the massive head, thrown slightly back,

convey the impression of sublime sacrfice, the expression of the face, almost smiling welcoming death. The hase of the memorial will correspond in beight with the figure and will be of pure white marble. Figures of Lombardy popular trees will form a background to the entire setting. The base extends around the figure on

three sides, leaving the front facing an open facade. While the site has not yet been determined, the matter being still pending before congress, the spot most favored by the Fine Arts commission is on the Fidal Basin in Potomac park just below the Pan-American building.

AIMS BLOW AT LOBBYISTS

Senator Lee Overman of North Carolina, chairman of the senate lobby investigating committee, will introduce a bili soon so drastic that it may bo questioned whether under its provisions a headquarters or office can be maintained in Wushington by any business organization interested in legislation. Not only will Senator Overman include features of the Massachusetts law requiring the registration of legislative counsel and agents. but he will incorporate the resolution of Andrew J. Peters of Massachusetts providing for the publication of a bulletin of committee henrings. This is a reform for which the press gallery and many members of house and senate have been worklug, hut action has been delayed party through the recent refusal of congress to transact general business.

"The point is this," said the senator The public has a right to know when hearings will be held, that it may be

properly represented. It has a right to know what class of men are trying to influence legislation in cougress and why. It is not improper for any person to appear before a congressional committee in favor of or in opposition to a measure, but it is improper for lobbyists to come here in disgulse, deceive the committees, if they can, and get work on the outside which often wears ail the aspects of Impropriety. Convincing Logic. H. The Defense (vv. 17-20). "But he, knowing their thoughts." Evidently they dared not openly to make their accusations. They would not sccept the natural and true explanation. Jesus endured this contradition and these charges for us (Isa. 53:3, 4), and must not bis disciples expect a like treatment? (Matt. 10:25). With convincing logic Jesus reveals their motivo (v. 16) and demonstrates the untenable position and conclusion which resulted from their own charge. Satan is not lighting himself. A klng aever seads nu nrmy against his owa soldlers, but ugainst those of hls enemy. Therefore, out of their own acknowledgement that the devils were cast out, he proves that the kingdom necusation (v. 15) was to Jesus an evldence of the depravity of their hearts. Thero is keen sarcasm in the answer he demanded from them (v. 19), Evidently they, too, had bad power over lemma into which he led them. This is not the only time that Jesus convicted men out of their own testi

mony (Matt. 21:25). HI. The Application (vv. 21-26). With a true teacher's sklil Jesus drives home the truth brought out In the preceding paragraph. Sataa is a "strong man," but he, Jesus, is stronger. lie has power to overcome and to take from the strong man bis armor (defense), and his speil, and to bind hlm fast (v. 22; Mark 3:27; Rev. 20:2). With Christ there must be entire possession; there can be no neutrality (v. 231. We cannot belong to Christ and be a slave to Satun, to mammou, to self, or even to others whom wo may love. 'The persistence of evil is hero Indicated. Unclean spirits are over seeking a habitation. Therefore It is not enough for a man to be elcansed, his dwelling must be occupied, and If the lioly Spirit does not take possession, the evil one will. The parable that follows (vv. 24-26) teaches this truth negatively. in oae case Satan is dislodged by Christ, ho finds the "paiace" (v. 22) (aian) to bo pre-occupied. In this case the paiaco is empty (Matt. 12.44). The absence of a positivo attachment, too, or possession by, Jesus Christ, involves hostility to him. IV. The Illustration (vv. 33-36), in his teaching. Jesus constantly used faulliar objects as illustrations. Jesus is the Light "We've heard the good news, and un." (John 7:17; 8:12), so also is the Christian. They are to be so set before mea that, seeing Christ reflected in them, they will glorify the Father who sent hilm. This is that which is used by God in redeening, transforming and eunobling earth's sinful chila like transformation and redemption. Hence the warning Jesus sounds in verse 35. Verse 36 is particularly vivld, for it suggests the beauty to he seen through the medium of a "P. S .- Please hring this letter with | charitable eye. What the eye is to the body so is the will to the soul. If the will be set upon pleasing God, thea the whole character will be surrendered to him, and there is therefore no danger such as is suggested In verse 26. This also suggested that many may be deceived by the "strong delusions" of the devli. That we be fully surrendered to God is therefore a matter of vast importance, and not to be thus surrendered is fraught with a darkness, a final estate, that is awful to contemplate.

HIS FIRST YEAR AT FARMING IN SASKATGHEWAN

Competition With the World.

There are thousands of young men

filling positions in stores and offices, and in professional occupations throughout the United States, who in their earlier life, worked on the farm. The allurements of city life were attractive, uatil they faced the stera reality. These people would have done better had they remained on the farm. Many of them, convinced of this, are now getting "back to the land," and in the experience, no better place offers nor better opportunity afforded, than that existing la Western Cannda. Mnny of them have taken advantage of it, and there are to be found today, hundreds of such, farming in the Provinces of Manltoba, Saskatchewan and Albertn. Tho conditions that surround farming operations today are so much superior to those in existence during their enrly farming days, that there is an nttractlon about it. Improved machinery, level and open plains, no rocks to shun, no trees to cut down, but wide stretches with mlle-long furrows, elevntors to handle the grain, railways to carry it to market, and bring nlmost to their doors the things necessary to operate. Splendid grazing areas, excellent opportunitles for rnlsing cattle. These things are all so different from what they once were that there is reason to speak of the attractions. R. H. Crossman of Kindersley, Snskatchewan, the mnn who won such splendid prizes at the International Dry Farming Congress held at Tulsa, Oklsboma, last fall, grew the prize grains during his first year farming. Up to 1913 he was nn engineer and the only knowledge he had of farming was that obtained when he was a boy. That was very useful; in fact it was valuable to hlm. He had not forgotten it. Thousands with as little experience no he had can do well by taking up one of the 160-acre grants offered by tho Canadian government. - Advertisement.

A Discovery Worth While

talking about is the splendid quality of our fine old Rye Whisky. It is inellow, rich flavored and pure, and makes a most delightful highball or bracing drink. It is matchless in its medicinal properties, too, and it never gives one a headache. If you are a critic of good liquors, you will be pleased to decommend this brand after the

ELECTRIC SIGNS!

The distinguishing air of quality which a firstclass Electric Sign gives to a store is the element which gives a sign its greatest value as an advertising medium and investment. The impression it makes is good. It blazes forth to the public that there is business enterprise, merchandise and methods up-to-date. It affects the entire atmosphere of the business district. The stranger says, "It is a live town," and publishes it abroad.
